

## Russia GOST-R Certification

Russia GOST-R Certification is a certification program according to the Russian national standard (GOSUDARSTVENNYY STANDART of RUSSIA). Most of the products intended to be marketed in Russia are required to have a GOST-R marking. When suppliers wish to export their products to Russia, a GOST-R Certificate of Conformity or Declaration of Conformity is required for customs clearance. Therefore, suppliers shall obtain the required certification before exporting.

We offer support services for obtaining the GOST-R Certification with cooperation from SERCONS Japan. As for ITE, the test reports issued by us can be used for obtaining the Certificate of Conformity, so customers need not to ship the product to Russia.

\* SERCONS Japan is a Japanese branch office of the Russian certification authority SERCONS (Head office: Moscow). SERCONS Japan, the only Russia GOST-R certification authority in Japan, can provide prompt services.

Please contact us for more information.
